

There were issues affecting this run of Lighthouse:

- **There may be stored data affecting loading performance in this location: IndexedDB. Audit this page in an incognito window to prevent those resources from affecting your scores.**
- **The page loaded too slowly to finish within the time limit. Results may be incomplete.**

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

NAMES AND LABELS

 Image elements do not have [alt] attributes	
 <code><frame></code> or <code><iframe></code> elements do not have a title	
 Form elements do not have associated labels	
 Links do not have a discernible name	

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

 Background and foreground colors do not have a sufficient contrast ratio.	
---	---

These are opportunities to improve the legibility of your content.

AUDIO AND VIDEO

 <code><video></code> elements contain a <code><track></code> element with [kind="captions"]	
---	---

These are opportunities to provide alternative content for audio and video. This may improve the experience for users with hearing or vision impairments.

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).
